

Don't Disconnect!

Wrap-around, no connector disconnects, with no cable pull-through required.

PRT® is a wrap-around, heat-shrinkable tubing that provides a means of adding additional insulation to an assembled wire or cable. PRT® can be used to protect in-service electrical systems without the need to remove or disassemble the associated connectors and end hardware. A heat gun is used to recover the material in a fashion similar to standard, non-split, heat-shrinkable tubing.

Available in 7 different colors!

Transition Boots Available

Great in-service repair tubing where a side-entry installation is required

Specifications

Durability	★ ★★ ★★★ Good Better Best	Elongation	200% (after shrink)
Material Type	Cross-linked polyolefin	Fluid Resistance	Excellent
Operational Temp	-67° to 275°F -55° to 135°C	Dielectric Strength	500v/mil (after shrink)
RoHS	Yes	Tensile Strength	1500 psi. (after shrink)
Material Thickness	0.035" - 0.055"	Mil-Spec	SAE-AMS-DTL-23053/5
Shelf Life	24 months	Fungicide	No growth
Flame Retardant	UL224, VW-1, Self-extinguishing
