

Zip-On®

Pressure-Closure Track Jacketing System

Multiple Options

Choose from four different pressure track closures and from five different jacketing materials.

The Zip-On® family of cable management products are as easy to install as they are to re-open. These products are available in a variety of materials, colors, shapes, and sizes.

Depending on your application, Zip-On® is available in a wide variety of extruded pressure-closure tracks such as the Z-Track, R-Track, EZ-Track®, and D-Track. The outside protective jacket comes in multiple material options including PVC, polyurethane, and Teflon extruded films. For extra ruggedness and durability, we also offer other polymer-coated fabric materials.

Plier Tool Available

See "Installation Tools" on Page 59

Any of the Zip-On® pressure tracks are easy to install on your application thanks to the available plier and slider tools
